

CastraNova POS — Project Quotation

Quotation Reference: KWG-CN-2026-0602-Q2 **Date:** 2 June 2026 **Valid until:** 2 July 2026 (30 days) **Prepared by:** K W G **Prepared for:** CastraNova (Bangkok HQ + Yangon Warehouse) **Scope artifact:** PRD v3.0 — [2026-06-02-castranova-pos-v3.0-prd.md](#)

This quotation supersedes the prior internal draft KWG-CN-2026-0602-Q1. It reflects the locked PRD v3.0 scope, the two-milestone payment structure, and Thailand-procured hardware references.

1. Executive Summary

KWG will design, build, deploy, train on, and support **CastraNova POS v1** — a barcode-tracked inventory and channel-margin reporting system spanning Bangkok HQ administration and Yangon warehouse operations — per the locked scope in **PRD v3.0** (FR-001 through FR-020).

This engagement also includes a small AI integration that complements the core workflow — exact feature scoped at contract signing.

Total fee: \$1,000 USD (≈ ฿35,000 THB), all-in, fixed-price. Payment in two milestones: 50% upfront + 50% on delivery. Timeline: two to four weeks from contract signing to go-live.

The fee covers all twenty functional requirements, the AI integration, deployment, parallel run, one day of on-site training per office, and 30 calendar days of post-launch bug-fix support. After the first 30 days, an optional monthly SLA at ฿5,000 / month is available for continuing bug-fix and minor-support coverage.

2. Scope

The complete functional and non-functional scope is defined in **PRD v3.0** ([2026-06-02-castranova-pos-v3.0-prd.md](#)). This quotation is priced against the v3.0 scope **as locked on 2 June 2026**. Any change after this date is a change order (see §9).

In-scope summary:

AREA	WHAT'S DELIVERED
Catalog & master data	Product catalog · Per-product pricing with FIFO cost tracking · Suppliers, customers, projects · User & role management
Receiving at Yangon	Serialized receiving (machines + high-value parts) · Commodity-parts receiving with FIFO batches
Consumption	Sale · On-site maintenance (recorded at warehouse) · Project Pull workflow · Pricing overrides with approval queue
Inventory management	Admin-only Stock Adjustment (FIFO-aware)
Reports & dashboards	Stock-on-hand · Monthly channel margin · Holding period · Search & lookup · Low-stock alerts · PDF + Excel exports
Notifications	LINE + Viber operational alerts with per-user opt-in
Audit & compliance	Append-only audit trail with dual-actor tagging on Project Pulls
Analytics	Customer detail dashboard · Project detail dashboard · Role-tiered access
AI integration	Small AI-powered feature complementing the workflow — specific capability finalized at contract signing

3. Deliverables

At end of engagement, CastraNova receives:

- A working **web application** accessible from Bangkok HQ and the Yangon warehouse, running on the CastraNova-owned Hostinger VPS
- All **source code** transferred to a CastraNova-owned private GitHub repository
- **Deployment** to production with HTTPS, daily database backups, and a tested restore procedure
- **One-time catalog seed import** from CastraNova's existing CSV / Excel product list
- **LINE and Viber bot setup** for the first ten user accounts
- **Bluetooth barcode scanner field tuning** on the reference scanner models (see §5)
- **Two-week parallel run** with existing spreadsheets before retirement
- **One day of on-site training** at each office (Bangkok HQ + Yangon warehouse)
- **30 calendar days of post-launch bug-fix support** at no additional charge
- **Operations runbook** covering user onboarding, label printer setup, and routine admin tasks

4. Price & Payment

Total project fee: **\$1,000 USD (≈ ฿35,000 THB)**, fixed-price, all-in for the scope above.

Exchange rate is indicative at approximately 35 THB per USD. Actual conversion handled by CastraNova's bank at payment time.

Payment schedule

MILESTONE	TRIGGER	AMOUNT
Mobilization (50%)	Quotation acceptance signed + PRD v3.0 sign-off	\$500 USD (≈ ฿17,500 THB)
Delivery (50%)	Production cutover + start of parallel run	\$500 USD (≈ ฿17,500 THB)
Total		\$1,000 USD (≈ ฿35,000 THB)

Terms:

- Invoices issued on milestone trigger; payable net 14 days.

5. Hardware & Hosting (Client-Owned, Not in Project Fee)

The items below are **CastraNova's procurement responsibility** and are **not included** in the \$1,000 project fee. KWG will assist with initial setup but does not procure or invoice for the hardware. All prices are indicative — confirm with the listed vendors before purchase.

5.1 Bluetooth Barcode Scanners

ITEM	USE	INDICATIVE PRICE	VENDOR
TYSSO BCP-2DC Bluetooth scanner (1D + 2D, HID mode)	Primary scanner — Yangon warehouse	~฿4,500 each	POSPAK Thailand · Shop4Thai
Posiflex CD-3870 Bluetooth scanner (1D, HID mode)	Backup unit	~฿3,800 each	Posiflex Thailand distributor

Both models operate as keyboard wedges over Bluetooth HID — staff scans into a focused field on screen. KWG QAs against both reference models during deployment. Other HID-mode scanners may work but are supported on best-effort only.

Suggested quantity: 1× TYSSO + 1× Posiflex = ฿8,300 one-time.

5.2 Label Printer & Consumables

ITEM	USE	INDICATIVE PRICE	VENDOR
TSC TDP-225 (2-inch desktop direct thermal label printer, USB)	Warehouse label printing at serialized receipt	~฿8,500	BARIGAN Thailand · PM Labels
Direct thermal label rolls (4×6 in, 200 count, compatible with TSC TDP-225)	Consumable	~฿300 per roll · estimated 4 rolls per year	Local label suppliers

Suggested first-year outlay: ฿8,500 printer + ฿1,200 labels = ฿9,700.

5.3 Hosting (Hostinger KVM 8 VPS, Singapore region)

CastraNova will subscribe to **Hostinger KVM 8** (www.hostinger.com). KWG provisions and configures the server during deployment; the subscription is in CastraNova's name.

COST ITEM	FIRST YEAR (PROMO)	YEAR 2 ONWARD (RENEWAL)
Hostinger KVM 8 VPS (8 vCPU / 16 GB RAM / 100 GB SSD)	\$341.88 (12-month promo @ \$28.49/mo)	\$647.88 / yr (renewal @ \$53.99/mo)
Domain registration (e.g. <code>pos.castranova.com</code>)	\$0 (free with VPS first year)	~\$13 / yr
Taxes	~\$24	~\$45
Total	~\$365.81 ≈ ₱12,800	~\$706 ≈ ₱24,700 / yr

⚠ **Year 2 cost roughly doubles** when the promotional rate ends. CastraNova may want to lock in a 24-month plan at signup for further savings (a one-click option on the Hostinger cart). KWG can advise but does not pay the subscription.

Optional add-on: Hostinger Daily Auto-Backup at \$24/mo (~₱840/mo). Pairs with KWG's daily `pg_dump` backup for redundancy. KWG recommends but does not require.

5.4 LINE Messaging API & Viber Bot

ITEM	INDICATIVE PRICE	OWNER
LINE Messaging API channel	Free tier (500 push messages / month included)	CastraNova-owned
Viber Bot account	Free	CastraNova-owned

CastraNova owns the channel access tokens; KWG configures the integration during deployment.

5.5 Client-owned cost summary (indicative)

BUCKET	ONE-TIME	FIRST-YEAR RECURRING	RENEWAL RECURRING
Scanners (1× TYSSO + 1× Posiflex)	~₱8,300	—	—
Label printer (TSC TDP-225)	~₱8,500	—	—
Label rolls (4 rolls / year est.)	—	~₱1,200	~₱1,200
Hostinger KVM 8 + domain + tax	—	~₱12,800	~₱24,700
LINE / Viber	—	₱0	₱0
Subtotal	~₱16,800	~₱14,000	~₱25,900

6. Post-Launch Support

6.1 Included — First 30 calendar days post go-live (no additional charge)

- Bug fixes for any defect traceable to the PRD v3.0 scope
- Hot-fix deployment via the same Hostinger pipeline
- **SLA — Critical issues** (system unavailable, data loss, security): response within 4 hours, fix within 1 business day
- **SLA — Non-critical issues:** response within 1 business day, fix within 5 business days

6.2 Optional — Monthly Service Level Agreement (from month 2 onward)

After the 30-day included window, CastraNova may opt into a continuing monthly SLA:

ITEM	PRICE	WHAT'S COVERED
Monthly SLA	฿5,000 / month	Bug-fix support · monthly system health check · LINE / Viber bot enrollment for new users · admin runbook updates as the system evolves · same response SLAs as §6.1

Terms of the monthly SLA:

- Three-month minimum commitment if opted in.
- Billed monthly; invoiced at the start of each month, payable net 14 days.
- Does **not** include new features or scope changes beyond PRD v3.0 — those are change orders (§9).
- 30 days written notice from either side to terminate.

CastraNova is not obligated to opt in. If no SLA is purchased, post-month-1 support is handled ad-hoc — KWG and CastraNova agree on a price per request before any work starts.

7. Assumptions & Exclusions

7.1 Assumptions (a material change to any of these is a change order)

1. PRD v3.0 is the locked scope as of 2 June 2026.
2. CastraNova provides the existing product catalog (CSV / Excel) within the first week of mobilization.
3. CastraNova nominates a **primary product owner** (Bangkok admin) available for ~4 hours / week of review and sign-off during the engagement.
4. CastraNova procures the reference scanners (TYSSO + Posiflex), label printer (TSC TDP-225), and label rolls before deployment.
5. CastraNova subscribes to **Hostinger KVM 8** in CastraNova's own account before deployment.
6. CastraNova users are reachable on LINE and / or Viber for the one-time bot enrollment.
7. Phase sign-off and feedback turnarounds within 3 business days. Delayed sign-off does not delay invoicing.

7.2 What's NOT included in the \$1,000 fee

- Hardware (scanners, label printer, label rolls)
- Hosting subscription (Hostinger VPS, domain, optional auto-backup)
- LINE Messaging API charges beyond the free tier
- Customer-facing legal tax documents
- Warranty start / end tracking per unit
- Multi-currency or multi-language support
- Native mobile app (the web app runs on phones as a backup)
- Direct integration with accounting or tax systems (reports export to PDF + Excel for hand-off)

For a complete list of v1 exclusions, see PRD v3.0 §9.

8. Warranty

KWG warrants the delivered software to perform per the PRD v3.0 acceptance criteria for **90 calendar days post-delivery**. Within the warranty window, KWG will fix defects (deviations from PRD acceptance criteria) at no additional charge.

Warranty excludes defects caused by:

- Hardware failure (scanners, printer, server hardware)
- Third-party service outage or behavior changes (Hostinger, LINE, Viber, label printer drivers)
- CastraNova-side data entry errors or unauthorized code modifications
- Use outside the documented operational scope

9. Change Orders

Any change to PRD v3.0 scope after 2 June 2026 follows this process:

1. CastraNova requests a change in writing.
2. KWG provides a written impact assessment within 3 business days, covering scope, effort, calendar impact, and a proposed price for the change.
3. CastraNova approves the proposed price in writing.
4. KWG begins work after approval; the change order amount is invoiced separately from the main project fee.

Each change order is priced **by mutual agreement** between KWG and CastraNova — typically as a flat fee per change. No standing day rate is set in advance.

10. IP, Confidentiality & Termination

10.1 Intellectual Property

All source code and deliverables become **CastraNova's property upon final payment** of the \$1,000 engagement total. Until final payment, KWG retains all IP rights. KWG retains the right to reuse generic patterns (architectural approaches, reusable utilities) in future engagements; no client-specific business logic, schemas, or data is reused.

10.2 Confidentiality

KWG treats all CastraNova business data (catalog, customer lists, prices, margins) as confidential. KWG does not retain copies of production data after the engagement ends. A standard mutual NDA can be attached on request.

10.3 Termination

- **For cause (either party):** 30 days written notice for material breach uncured within the notice period. Settlement covers work completed to date at pro-rata price.
- **For convenience (CastraNova):** Settlement covers the upfront mobilization payment plus any pro-rata work completed since.
- **Source code transfer on termination:** KWG transfers all work to date in a private GitHub repo handover within 5 business days of effective termination, regardless of cause.

11. Validity & Acceptance

- This quotation is valid for **30 days** from the date above (2 June 2026 → 2 July 2026).
- **Acceptance:** sign and date the signature block below, or issue a purchase order referencing **KWG-CN-2026-0602-Q2**.
- Engagement starts on the first business day after KWG receives (a) signed acceptance and (b) the 50% mobilization payment.

12. Signatures

For K W G:

Name: _____ Title: _____ Signature: _____ Date: _____

For CastraNova:

Name: _____ Title: _____ Signature: _____ Date: _____

This quotation incorporates PRD v3.0 (locked 2 June 2026) by reference. In case of conflict between this quotation and PRD v3.0, PRD v3.0 governs scope; this quotation governs commercial terms.
